Specialties

About the Health, Hygiene, & Specialties Division

Infrastructure & Land Management

- Weather barriers & roof underlay
- Geosynthetics
- Pipeline protection & cable wraps
- Crop & forestry protection

Specialized Industrial Solutions

- Composites
- Technical materials
- Flexible intermediate bulk containers

Our Technologies

Are solving material challenges around the world...

Raw Materials

- Resins & Fibers
 - Polypropylene
 - Polyethylene
 - Polyester
 - Elastomer
 - Polylactide
 - Viscose
 - Pulp
 - Tissue
 - Cotton
 - Bi-component
 - Mineral
 - Additives

Formulation

- Spunlaid & Meltblown
 - Bico
 - Filament Shapes
- Carded
- Proprietary
 - Reemay®
 - Meltex™
- Cast Film & Coating
 - Breathable
 - Embossed
 - Smooth
- Blown Film
- Rigid Molding
 - Injection
 - Blow
 - Thermoforming

Bonding

- Calendering
 - Performance
 - Soft
 - Pattern
- Fiber Bonding
 - Through-Air
 - Hydroentangling
 - Spunlace
 - Spinlace®
 - APEX®
 - Adhesive
 - Resin Bond
 - Thermal
 - Needlepunch

Finishing

- Surface Treatments
 - Surfactant
 - Repellent
- Printing Coating
- Laminating
 - Adhesive
 - Ultrasonic
 - Extrusion
- Stretch Activating
- Silicone Coating
- Embossing & Aperturing
- Spooling & Slitting
- Bag/Pouch Making
- Liner & Desiccant Insertion

Converting

- Folding
- Forming
- Assembly
- Packaging

Complete Solutions Provider

What Do We Do?

- Provide full design & centralized program management
- Support multiple site manufacturing options
- Scalability that can accelerate market access & penetration

How Do We Do It?

- Strong technical & operations teams
- State of the art facilities in key regions around the world
- Flexibility & speed in development
- Superior quality standards & regulatory expertise to execute even the most complex projects

Complete Solutions Provider

Global Footprint

with large and small scale contract capabilities, using state of the art manufacturing operations

Local Development

team support for new & ongoing programs

Product Testing

and compliance in accordance with the U.S. and the EU regulatory requirements

World-class R&D Facilities

that offer the very best in material science, process technology & expertise

Partnership

Partnering for growth with business & product solutions from a trusted, responsive global leader

- Complete solutions provider
- Delivering advanced solutions & supply chain efficiencies
- Consistent high quality
- Depth & breadth of nonwoven, rigid, plastics & film portfolios
- User-focused innovation
- Economic leadership

Lead

Product differentiation & performance advantage from world-leading assets & our technical team

Simplify

Streamline with a partner who can truly innovate & add value across your supply chain & around the world

Deliver

Added value to your customers through superior service & the widest range of solutions

Gain

Performance advantage by sourcing specialty materials from Berry Global

Blue Clover Studios

A state-of-the-art design studio

Creativity Meets Functionality:

Our design team focuses on finding the right spot between what is imaginable and what is manufacturable.

Designing for the World's Leading Brands:

We blend inspiration with your vision and brand essence to create winning designs.

Bringing Packaging to Life:

From 3D renders to our full service model shop, we have the tools necessary to breathe life into the future of your brand.

A State-of-the-Art Design Studio

We specialize in designing packaging that marries creativity & functionality to meet end users' needs & desires. From our design studio to our advanced model shop, we bring project designs into reality for our clients.
